Thank you for your purchase of McKay Products RJ45 _BOB Test Fixture.

McKay Products USA, announces the version 3 of there RJ45 Break-Out Box, RJ45-BOB. The RJ45-BOB brings out all the connections to test points and binding posts for the now common RJ45 connector found on late-model mobile and Amateur radios, Ethernet, serial cables, T1 lines and a host of other interface applications.

Features include:

Gold plated test points.

Binding Post connections.

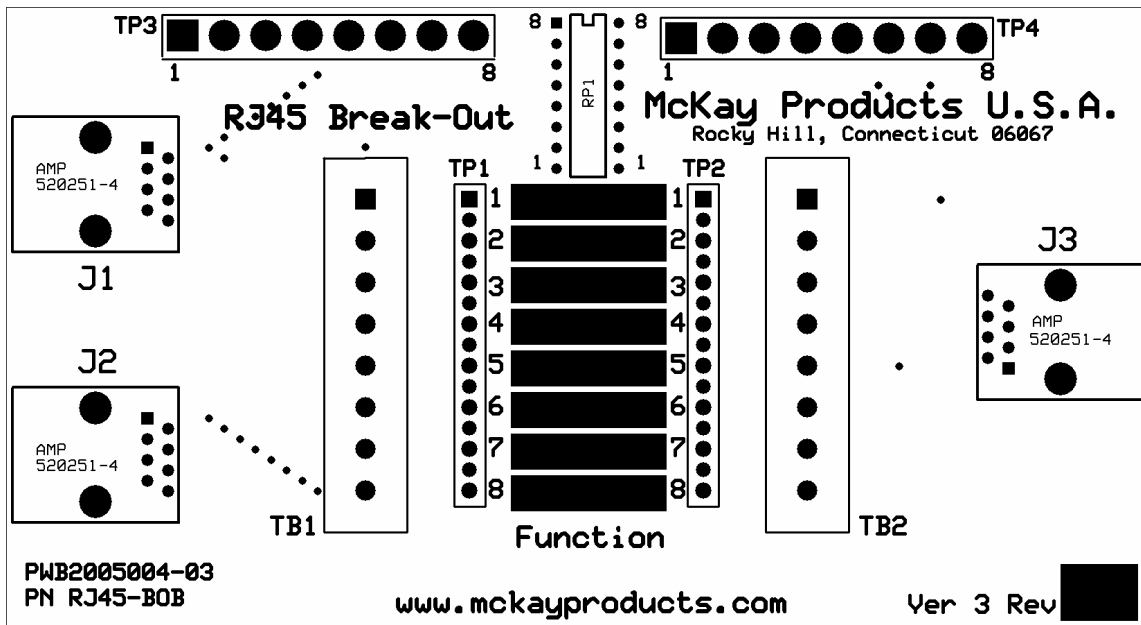

Convenient solder points for connection to custom test equipment.

Label area for each RJ45 pin

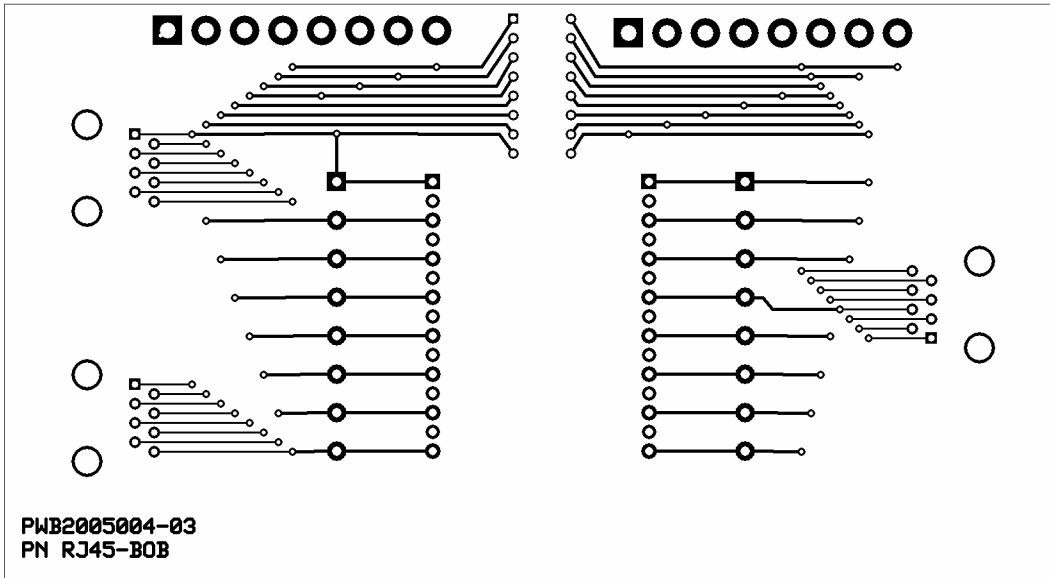

One side has two RJ45's in a "Loop Thru" configuration.

Other side has one RJ45 as a "Dead End" configuration.

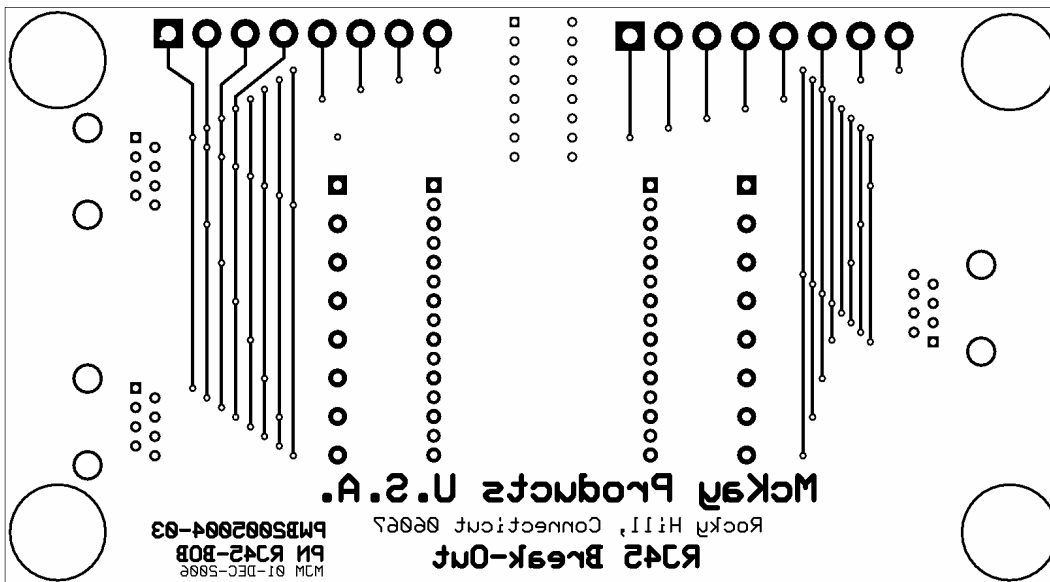

New for Version 3, 16 pin DIP socket with Pin Header for more convenient cross wiring and external connections.

Silk Screen

PCB Top

PCB Bottom
